

Product	Subtitle	Description
4000 D AH Exec	A whole-home air purification system, ideal for small houses	Our 4000 series features our smallest, most compact air purification systems. The 'AH' denotes that this system can be attached to a forced air HVAC system, to provide complete air filtration for small homes or businesses where airborne chemicals, gases and odors are the primary concern. The 4000 D AH Exec is equipped with our Exec carbon blend and a 3" deep bed filter for superior adsorption of harmful toxins. A micro-HEPA filtration system for particles completes this system. Additional options include UV light and Titanium Dioxide (TiO2).
4000 D AH Vocarb	A whole-home air purification system, ideal for small houses	Designed for smaller homes or businesses where Volatile Organic Compounds (VOC's), chemicals and odors are the primary concern. This unit features our Vocarb blend of carbon and a 3" deep-bed carbon filter for enhanced adsorption of aggressive VOC's like formaldehyde and benzene that are more difficult to trap. Compatible with any forced air HVAC system. Additional options include UV light and Titanium Dioxide (TiO2).
4000 D Exec	Our smallest, most compact unit available for chemicals, gases and odors	Designed to remove heavy concentrations of chemicals and odors in smaller spaces, the 4000 D Exec features a 16 lb., 3" deep bed carbon filter, a micro-HEPA for particles and an easy-clean pre-filter. Additional options include UV light and Titanium Dioxide (TiO2).
4000 D Vocarb	Our smallest, most compact unit available for chemicals, gases and odors	D Vocarb models are designed to tackle heavy concentrations of airborne pollutants, odor and Volatile Organic Chemicals in small areas. The 3" deep bed filter and Vocarb blend of carbon provides enhanced adsorption of smaller VOC's like formaldehyde and benzene that are difficult to trap. Ideal for serious air cleaning in smaller spaces. Additional options include UV light and Titanium Dioxide (TiO2).
4000 DX Exec	Our smallest, most compact unit available for chemicals, gases and odors, combined with an extra-deep carbon filter bed	Designed to treat very heavy concentrations of chemicals and odors in smaller areas. The 4000 DX Exec offers a deeper 3.5" deep, 18 lb. carbon filter for enhanced adsorption of airborne toxins, a micro-HEPA for particles and an easy-clean pre-filter. Additional options include UV light and Titanium Dioxide (TiO2).
4000 DX Vocarb	Our smallest, most compact unit available for chemicals, gases and odors, combined with an extra-deep carbon filter bed	DX Vocarb models are designed to tackle very heavy concentrations of airborne chemicals, odors and Volatile Organic Chemicals. The 3.5" extra-deep bed (DX) and Vocarb blend of carbon provides enhanced adsorption of smaller VOC's like formaldehyde and benzene that are difficult to trap. Ideal for serious air cleaning in smaller spaces. Additional options include UV light and Titanium Dioxide (TiO2).

4000 Exec	Our smallest, most compact unit available for chemicals, gases and odors	Wide spectrum protection at an outstanding value, this unit is recommended for areas where space is a main concern. It features a more compact design than the 5000 Exec, while still offering reliable chemical, gas, odor and particle filtration. Includes a 2.5" deep, 12 lb. activated carbon filter, medical-grade HEPA and an easy-clean pre-filter. Additional options include UV light and Titanium Dioxide (TiO2).
4000 Vocarb	Our smallest, most compact unit available for chemicals, gases and odors	This unit is designed to treat Volatile Organic Chemicals, odors and other airborne pollutants in smaller spaces. It features a 2.5" deep, 12 lb. Vocarb-blend activated carbon filter, which provides enhanced adsorption of smaller VOC's like formaldehyde and benzene that are difficult to trap. Additional options include UV light and Titanium Dioxide (TiO2).
5000 D AH Exec	An air purification solution for your whole home!	Designed to be compatible with all HVAC units, the 5000 D AH Exec provides whole-home filtration for medium-sized homes or businesses where chemicals and odors are the primary concern. It features our standard Exec carbon blend in a 2.5" deep bed filter for superior adsorption of harmful toxins. A micro-HEPA filter for particles completes the system. Additional options include UV light and Titanium Dioxide (TiO2).
5000 D AH Vocarb	An air purification solution for your whole home!	Designed to be compatible with all forced air HVAC systems, the 5000 D AH Vocarb provides whole-home filtration for homes or businesses where Volatile Organic Compounds and other chemicals and odors are the primary concern. This unit features our boosted vocarb blend of carbon in a 2.5" deep bed filter for superior adsorption of harmful toxins. A micro-HEPA for particles completes the system. Additional options include UV light and Titanium Dioxide (TiO2).
5000 D Exec	Optimal Air Filtration for Homes & Businesses	The 5000 series is our most popular line of air purifiers, with the most available options and the best value for maximum air cleaning. Choose the 5000 D Exec for its 3" deep-bed carbon filter and as the indoor air quality solution for most homes and businesses. Additional options include UV light and Titanium Dioxide (TiO2).
5000 D MCS Supreme	Air Purification Solution for MCS and Allergy Sufferers	The 5000 D MCS Supreme has all the same features as our 5000 MCS Supreme, plus the added benefit of an even deeper carbon bed filter and 6 more pounds of activated carbon. While the 5000 MCS Supreme is part of our basic models designed for MCS, the deep D filter improves its chemical adsorbing capacity.
5000 D Vocarb	Optimal Air Filtration for Homes & Businesses	D Vocarb models feature a special blend of carbon to tackle heavy concentrations of airborne pollutants, odor and Volatile Organic Compounds. With a 3" deep-bed 24 lb. carbon filter, a medical grade HEPA filter for particles and an easy-clean pre-filter, this unit is ideal for serious air cleaning in most homes and businesses. Additional options include UV light and Titanium Dioxide (TiO2).

5000 DS	The Ideal Solution for Smoky Environments	The 5000 DS is tailored specifically for cigar and cigarette smoke. This exceptional unit removes harmful chemicals, particles and lingering odors. It features a significant 3", 24 lb. deep-bed carbon filter, a tar-trapping pre-filter and a micro-HEPA for particles. Additional options include UV light and Titanium Dioxide (TiO2).
5000 DX Exec	Extra-deep carbon bed, extra-deep filtration!	Part of our 5000 series, the 5000 DX Exec is designed to treat very heavy concentrations of chemicals and odors in a confined space. The "DX" option offers a 27 lb. extra deep-bed 3.5" carbon filter for enhanced adsorption of airborne toxins, a micro-HEPA for particles and an easy-clean pre-filter. Additional options include UV light and Titanium Dioxide (TiO2).
5000 DX Vocab	Extra-deep carbon bed, extra-deep filtration!	Designed for spaces where very heavy concentrations of Volatile Organic Compounds and other chemicals and odors are the primary concern. The 5000 DX Vocab features a boosted blend of carbon in an 3.5", extra deep bed filter for superior adsorption of harmful toxins. A micro-HEPA for particles completes this powerful unit. Additional options include UV light and Titanium Dioxide (TiO2).
5000 DX VOG	Air Filtration for Volcanic Smog	The 5000 DX VOG is an air-purifying unit designed specifically to adsorb the dangerous chemicals, gases and toxic particles emitted from volcanic smog, or vog. The 3.5" deep carbon beds of the 5000 DX VOG provide increased chemical filtration, which is ideal for residents and businesses located within 100 miles of a volcano. Additional options include UV light and Titanium Dioxide (TiO2).
5000 DXS	Air Filtration Solution for Tobacco Smoke	With a 3.5" deep, 27 pound activated carbon filter, plus a tar-trapping pre-filter, the 5000 DXS is an ideal choice for smoky environments. The 5000 DXS works to adsorb the dangerous chemicals found in tobacco smoke, such as nicotine, formaldehyde, arsenic and cyanide
5000 MCS Supreme	Air Purification Solution for MCS and Allergy Sufferers	The 5000 MCS Supreme is our basic MCS model, featuring 15 pounds of activated carbon and a medical-grade HEPA filter to remove both airborne chemicals and particles. This unit features 3-speed control and an all-metal housing. Its special MCS features include a powder-coated canister as well as a test kit allowing each customer to choose the blend of activated carbon that best suits their individual sensitivities.
5000 W Exec	Source Capture Air Purification System	This modified unit offers users the added advantage of removing chemicals, particles and odors directly at their source. Capturing these toxins at the source prevents these toxins from becoming airborne. The 5000 W Exec is ideal for hobbyists, artists, welders, printers and others who do not want the dangerous material that they work with to become airborne. Comes standard with a 2.5" deep carbon bed filter. Additional options include UV light and Titanium Dioxide (TiO2).

5000 W Vocarb	Source Capture Air Purification System	This modified unit offers users the added advantage of removing hard-to-trap chemicals, particles and odors directly at their source. Capturing these toxins at the source prevents these toxins from becoming airborne. The 5000 W Vocarb is ideal for hobbyists, artists, welders, printers and others who do not want the dangerous material that they work with to become airborne. Comes standard with a 2.5" deep carbon bed filter. Additional options include UV light and Titanium Dioxide (TiO2).
6000 AH Exec	Our Largest, Most Powerful Whole-Home Air Purification System	The 6000 AH is designed to provide whole-home air filtration for larger homes and businesses where chemicals, gases and odors are the primary concern. When the 6000 AH is equipped with a 2.5" deep bed of our boosted vocarb blend of carbon, it is ideal for filtering a wide-range of aggressive airborne chemicals, gases and odors. Additional options include UV light and Titanium Dioxide (TiO2).
6000 AH Vocarb	Our Largest, Most Powerful Whole-Home Air Purification System	A whole-home air purification system ideal for general air purification with an emphasis on removing Volatile Organic Compounds and other airborne toxins. It features a 2.5" deep bed of our boosted Vocarb blend of activated carbon to adsorb chemicals and odors, and a medical grade HEPA filter to remove 99.97% of all airborne particles down to 0.3 microns. Compatible with all forced air HVAC systems. Additional options include UV light and Titanium Dioxide (TiO2).
6000 D AH Exec	Our Largest, Most Powerful Whole-Home Air Purification System	A whole-home air filtration system ideal for large homes and businesses, the 6000 D AH with our Exec blend of carbon is also equipped with a 3" deep ("D") carbon bed filter to provide an even more aggressive filtration capacity. Remove airborne chemicals, gases, odors, particles and provide your entire home with clean, filtered air. Additional options include UV light and Titanium Dioxide (TiO2).
6000 D AH Vocarb	Our Largest, Most Powerful Whole-Home Air Purification System	A whole-home air filtration system ideal for large homes and businesses, the 6000 D AH with our boosted Vocarb blend of carbon removes a wide spectrum of pollutants that are hard to trap and is also equipped with a 3" deep ("D") carbon bed filter to provide an even more aggressive filtration capacity. Remove airborne chemicals, gases, odors, particles, and provide your entire home with clean, filtered air. Additional options include UV light and Titanium Dioxide (TiO2). This system is designed to be attached to any forced air HVAC system.
6000 D Exec	Heavy-duty Air Filtration for Large, Severely Contaminated Environments	Designed primarily for removing heavy concentrations of chemicals and odors, the 6000 D features a significant 3" deep carbon bed filter with 28 lb. of our Exec blend of carbon, combined with a micro-HEPA for particles and an easy-clean pre-filter. Additional options include UV light and Titanium Dioxide (TiO2).
6000 DS Exec	Advanced Air Filtration for Environments with Cigarette and Cigar Smoke	The 6000 DS Exec was specifically tailored to remove the harmful chemicals, particles and strong odors associated with cigar and cigarette smoke. It features a significant 28 lb., 3" deep-bed carbon filter, a tar-trapping pre-filter and a micro-HEPA for particles. Additional options include UV light and Titanium Dioxide (TiO2).

6000 DX Exec	Heavy-duty Air Filtration for Large, Severely Contaminated Environments	The 6000 DX with the Exec blend of carbon is our largest unit, with the deepest bed of carbon available. This is a powerful air purification system designed to treat very heavy concentrations of chemicals and odors in larger confined spaces. The 6000 DX with Exec carbon offers a 36 lb., 3.5" extra-deep bed carbon filter for enhanced adsorption of airborne toxins, a micro-HEPA for particles and an easy-clean pre-filter. Additional options include UV light and Titanium Dioxide (TiO2).
6000 DX Vocab	Heavy-duty Air Filtration for Large, Severely Contaminated Environments	Designed for larger spaces where very heavy concentrations of Volatile Organic Compounds and other chemicals and odors are the primary concern. This 6000 DX is part of our most powerful line of air purifiers and features our boosted Vocab blend of carbon in a 3.5" extra-deep bed filter for superior adsorption of harmful toxins. A micro-HEPA for particles completes this powerful unit. Additional options include UV light and Titanium Dioxide (TiO2).
6000 DXS	Most Advanced Filtration Available for Tobacco Smoke	Our most advanced air purification system available for tobacco smoke, the 6000 DXS features 36 pounds of activated carbon, a 3.5" extra-deep filter and a special tar-trapping filter. Unlike conventional filters that become clogged with the sticky tar droplets found in cigarettes and cigars, the 6000 DXS continuously works to clean indoor air of smoke particles and chemicals, without being compromised.
6000 Exec	Heavy-duty Air Filtration for Large, Severely Contaminated Environments	A powerful general purpose air purifier, the 6000 Exec treats all the various types of pollutants which contribute to poor indoor air quality. It features 24 lbs. of activated carbon to adsorb chemicals, gases and odors and a medical-grade HEPA filter to remove 99.97% of all airborne particles down to 0.3 microns. It is part of our most powerful line of air purification systems. Comes standard with a 2.5" deep carbon bed filter. Additional options include UV light and Titanium Dioxide (TiO2).
6000 Vocab	Heavy-duty Air Filtration for Large, Severely Contaminated Environments	The 6000 Vocab is a large and powerful air purification system designed to treat Volatile Organic Compounds, odors and other airborne pollutants. It features a 2.5" deep, 24 lb. Vocab blend carbon filter, an easy-clean pre-filter and a medical-grade HEPA filter which removes 99.97% of all airborne particles down to 0.3 microns. Additional options include UV light and Titanium Dioxide (TiO2).
6000 W Vocab	For the Most Powerful Source Capture Air Filtration Available	The 6000 W is a source capture unit designed to trap chemicals, gases, and odors before they become airborne. Its convenient flex hose is adaptable to various positions, and is ideal for hard-to-reach places, where pollutants are emitted. The unit features 24 pounds of activated carbon, in a 2.5" deep carbon bed filter, in combination with a high-performance HEPA filter for additional particle filtration. Additional options include UV light and Titanium Dioxide (TiO2).
AirMedic D Exec	Air Filtration with Increased Particle Control, Ideal for the Allergy Sufferer	With its advanced particle control and air filtration capacity, the AirMedic series is the ideal choice for the allergy and asthma sufferer. The AirMedic D is designed with 360-degree air intake, allowing for greater contact with particles and more effective filtration. Its 3" deep carbon bed filter also makes the AirMedic D an effective solution for the removal of chemicals, gases and odors.

AirMedic D MCS	Air Purification Solution for MCS and Allergy Sufferers	The AirMedic D MCS has all the same features as our AirMedic MCS, and has the additional benefit of an even deeper carbon bed filter and 7 more pounds of activated carbon, for a total of 25 pounds. The D model is the ideal choice for people with serious reactions to airborne chemicals.
AirMedic D Vocarb	Air Filtration with Increased Particle Control, Ideal for the Allergy Sufferer	With its advanced particle control and air filtration capacity, the AirMedic series is the ideal choice for the allergy and asthma sufferer. The AirMedic D is designed with 360-degree air intake, allowing for greater contact with particles and more effective filtration. Its 3" deep carbon bed filter also makes the AirMedic D an effective solution for the removal of chemicals, gases and odors.
AirMedic Exec	Air Filtration with Increased Particle Control, Ideal for the Allergy Sufferer	The AirMedic is our most efficient unit for particles. It tests noticeably better than the standards set for regular HEPA filters, making it more than 99.97% effective at removing particles 0.3 microns in size. An 18 lb., 2" deep carbon bed filter for airborne chemicals, gases and odors rounds out this remarkable filtration system.
AirMedic MCS	Air Purification Solution for MCS and Allergy Sufferers	The AirMedic MCS features 18 pounds of carbon and medical-grade HEPA to filter the air of airborne chemicals and gases that can so adversely affect MCS and allergy sufferers. Its special MCS features also include a powder-coated carbon canister, sure seal gaskets for increased particle protection and 360-degree air intake.
AirMedic Vocarb	Air Filtration with Increased Particle Control, Ideal for the Allergy Sufferer	The AirMedic is our most efficient unit for particles. It tests noticeably better than the standards set for regular HEPA filters, making it more than 99.97% effective at removing particles 0.3 microns in size. An 18 lb. carbon filter for airborne chemicals, gases and odors rounds out this remarkable filtration system. Comes standard with a 2" deep carbon bed filter.
AirMedic VOG	Advanced Air Filtration for Volcanic Smog	With 18 pounds of specialized vog carbon, a medical-grade HEPA filter and 360-degree air intake, the AirMedic VOG is the ideal air-purifying unit for people affected by the dangerous components of volcanic smog, or vog. This unit also provides advanced particle protection, to create clean, safe indoor air. Comes standard with a 2" deep carbon bed filter.
AirMedic+ D Exec	Air Filtration with Increased Particle Control, Ideal for the Allergy Sufferer	The AirMedic+ D is our most efficient unit for particles coupled with a deep-bed carbon filter for the treatment of heavy concentrations of airborne chemicals, gases and odors. This unit is also DOP tested and provides 360-degree air intake. Comes standard with a 3" deep carbon bed filter.

AirMedic+ D Vocarb	Air Filtration with Increased Particle Control, Ideal for the Allergy Sufferer	The AirMedic+ D is our most efficient unit for particles coupled with a deep-bed carbon filter for the treatment of heavy concentrations of airborne chemicals, gases and odors. This unit is also DOP tested and provides 360-degree air intake. Comes standard with a 3" deep carbon bed filter.
AirMedic+ Exec	Air Filtration with Increased Particle Control, Ideal for the Allergy Sufferer	A triumph in engineering, the AirMedic+ is our most efficient unit for particles. It tests noticeably better than the standards set for regular HEPA filters, making it more than 99.97% effective at removing particles 0.3 microns in size. An 18 lb. carbon filter for airborne chemicals, gases and odors rounds out this remarkable filtration system. Convenient variable speed motor. DOP tested. Comes standard with a 2" deep carbon bed filter.
AirMedic+ MCS	Relief for People Suffering with MCS and Allergies	The AirMedic MCS is a specialized unit designed especially for people with Multiple Chemical Sensitivity and allergies. Manufactured with the most inert materials, including an organic cotton filter, all-metal housing, and a powder-coated carbon canister, the AirMedic MCS adsorbs chemicals, particles and odors, with little or no off gassing, to provide relief to MCS sufferers. Comes standard with a 2" deep carbon bed filter.
AirMedic+ MCS D	Relief for People Suffering with MCS and Allergies	With an even deeper carbon bed than the AirMedic MCS, the AirMedic MCS D provides the highest degree of adsorption for a wide spectrum of chemicals, gases and odors, and is the ideal air filter for a MCS sufferer living in a highly polluted environment. It's made with completely inert materials, to provide the most effective MCS relief available in today's market. Comes standard with a 3" deep carbon bed filter.
AirMedic+ Vocarb	Air Filtration with Increased Particle Control, Ideal for the Allergy Sufferer	Are you looking for advanced protection from dangerous respirable particles and hazardous chemicals? The AirMedic+ is our most efficient unit for particles and features the added protection of an 18 lb., 3" deep-bed activated carbon filter for chemicals, gases and odors. This remarkable filtration system uses a medical-grade HEPA filter to eliminate 99.97% of airborne particles 0.3 microns in size, in conjunction with our special Vocarb-blend carbon to adsorb chemicals, volatile organic compounds (VOC's), gases and odors. Ideal for use next to desktop printers, in bedrooms or any area that requires particle and chemical filtration.
AirMedic+ VOG	Most Advanced Air Filtration for the Dangerous Properties of Volcanic Smog	Based on the same technology as our AirMedic VOG, the AirMedic+ VOG also has 18 pounds of specialized vog carbon, a medical-grade HEPA filter and 360-degree air intake to provide protection from volcanic smog (vog), plus it can be customized with an ultraviolet (UV) light to eliminate viruses, mold and bacteria. This unit is our most advanced air purifier for vog, and was designed specifically for Hawaiian residents, or others affected by vog. Comes standard with a 2" deep carbon bed filter.
AirTube Exec	Perfectly Portable Air Filtration that's Compact, Lightweight & Affordable!	Our classic compact AirTube air purifier is the perfect companion for people on the go. Completely portable and lightweight, the AirTube is ideal for the business/avid traveler who wants clean air, no matter the location. Ideal for localized chemical, odor and particle removal, this unit is also suggested as a desktop purifier, or for smaller rooms.

AirTube Supreme Exec	Perfectly Portable Air Filtration that's Compact, Lightweight & Affordable!	Our most powerful portable air purifier for localized chemical, odor and particle removal. Extra chemical and odor protection in a lightweight format. Great for small spaces.
AirTube Supreme Vocarb	Perfectly Portable Air Filtration that's Compact, Lightweight & Affordable!	Our most powerful portable air purifier for localized chemical, odor and particle removal. Extra chemical and odor protection in a lightweight format. Great for small spaces.
AirTube Vocarb	Perfectly Portable Air Filtration that's Compact, Lightweight & Affordable!	A compact air purifier for localized VOC, chemical, odor and particle removal. It features our boosted Vocarb blend of carbon which is excellent for volatile organic compounds like benzene and formaldehyde. Ideal for use as a desktop purifier, for travel or for smaller rooms.
I-6500 AH 160	Powerful Whole-home Air Filtration System Compatible with any HVAC System	The I-6500 series is designed for serious air filtration in commercial and industrial spaces. Available in several configurations, the I-6500 AH is designed to be attached to a forced air HVAC system. This system features a 160 pound activated carbon filter and a medical-grade HEPA filtration system.
I-6500 AH 80	Powerful Whole-home Air Filtration System Compatible with any HVAC System	The I-6500 series is designed for serious air filtration in commercial and industrial spaces. Available in several configurations, this option may be attached to a forced air HVAC system. This option features an 80 pound activated carbon filter and a medical-grade HEPA filtration system.
Salon 5000	Ideal Air Filtration Systems for Nail Salons	Engineered specifically for nail salons, the Salon 5000 is a source capture air-purifying unit designed to capture chemicals, odors and particles associated with manicures and pedicures, before they become airborne. The Salon 5000 is equipped with 18 pounds of carbon to provide nail salon patrons and employees alike with clean, safe indoor air.
Salon 6000	Advanced Air Filtration Systems for Nail Salons	The Salon 6000 features six more pounds of carbon than our Salon 5000 model to provide superior filtration capacity for the chemicals, odors, gases and particles associated with nail salon products. The Salon 6000 is a source capture unit that provides clean air, in an otherwise toxic environment that can be dangerous for both nail salon patrons and employees.
